

Dispute protection for every merchant on your platform.

Zevron answers your merchants' chargebacks for them: it gathers the evidence, writes the response and files it before the deadline, in your brand. Merchants pay only on wins, and you earn a share of each one.

FOUR WAYS IN, PICK ANY

1 One API call per merchant

Create a merchant with your own ID: no signup, no setup. Stripe Connect platforms cover every connected account with one key.

2 A dispute card in your dashboard

A signed card your merchants see where they already work: protection, money at stake, responses to approve.

3 On by default

Turn protection on for every merchant at once, each with a notice in your brand and a one-click opt-out.

4 Billing your way

We bill your merchants and pay you your share, or the fee rides your invoice and you pay us the net monthly.

YOUR NUMBERS

Your merchants keep, every month

+\$26,130

more than today, after our fee

Won back a month, today	\$13,650
-------------------------	----------

Won back a month, with Zevron	\$46,800
-------------------------------	----------

More disputes won a month	510
---------------------------	-----

You earn a month	\$1,404
------------------	---------

You earn a year	\$16,848
-----------------	----------

FROM THESE INPUTS

Disputes a month	2,500
------------------	-------

Average dispute	\$65
-----------------	------

Merchants with Zevron on	80%
--------------------------	-----

Answered today / won	35% / 30%
----------------------	-----------

Answered by Zevron / won	90% / 40%
--------------------------	-----------

Merchants pay on a win	15%
------------------------	-----

Your share of the fee	20%
-----------------------	-----

Win rates are assumptions to replace with your own.

HOW THE MONEY WORKS

Merchants	First 10 disputes free, then 15% of what's won back, or a price we agree with you. Nothing on losses.
------------------	---

You	A revenue share of every fee, 20% to start, or wholesale: we keep an agreed share of what's recovered and you keep the rest.
------------	--

Each month	A statement per merchant on the 1st, by webhook, API and CSV. Sandbox merchants are never billed.
-------------------	---

Estimates from the inputs above, not a promise. Each merchant's first disputes are free, so early months earn less.
